

*C-100*

1. (Amended) A lens drive device to be detachably mounted to a lens device body, the detachable lens drive device comprising:  
a motor;  
a storage device which stores information prescribing a braking characteristic of a moving object driven by the motor;  
an input device which inputs a signal for changing the braking characteristics; and  
a braking characteristic setting device which changes settings of the braking characteristic according to the signal received from the input device.

***Please add new claim 4 as follows:***

--4. (New) A lens drive device to be detachably mounted to various types of lens device bodies, comprising:  
a motor portion for driving various types of moving objects;  
a storage portion for storing information prescribing braking characteristics of the various types of moving objects to be driven by the drive portion;  
an input portion for receiving a signal instructing a change in the braking characteristic;  
a braking characteristic setting portion for changing the settings of the braking characteristic according to the signal received in the input portion;  
a display portion attached to the various types of lens device bodies for displaying the status of the lens; and  
a switching portion for switching the display to correspond with the changing of the braking characteristic.--
